

Spray-Net Paint A Proprietary Innovation

When starting any new business, it's crucial to have a product or service that can't be found anywhere else in your area. Having something unique to offer will help you stand out from the competition and become a trusted source to your customers. When you become a part of the Spray-Net brand, you'll have access to our unique and patented painting process. These processes offer a simple and cost-effective remodeling solution for homeowners and increase the barrier to entry for potential competitors. Let's take a closer look at how our products and services stand out from the competition.

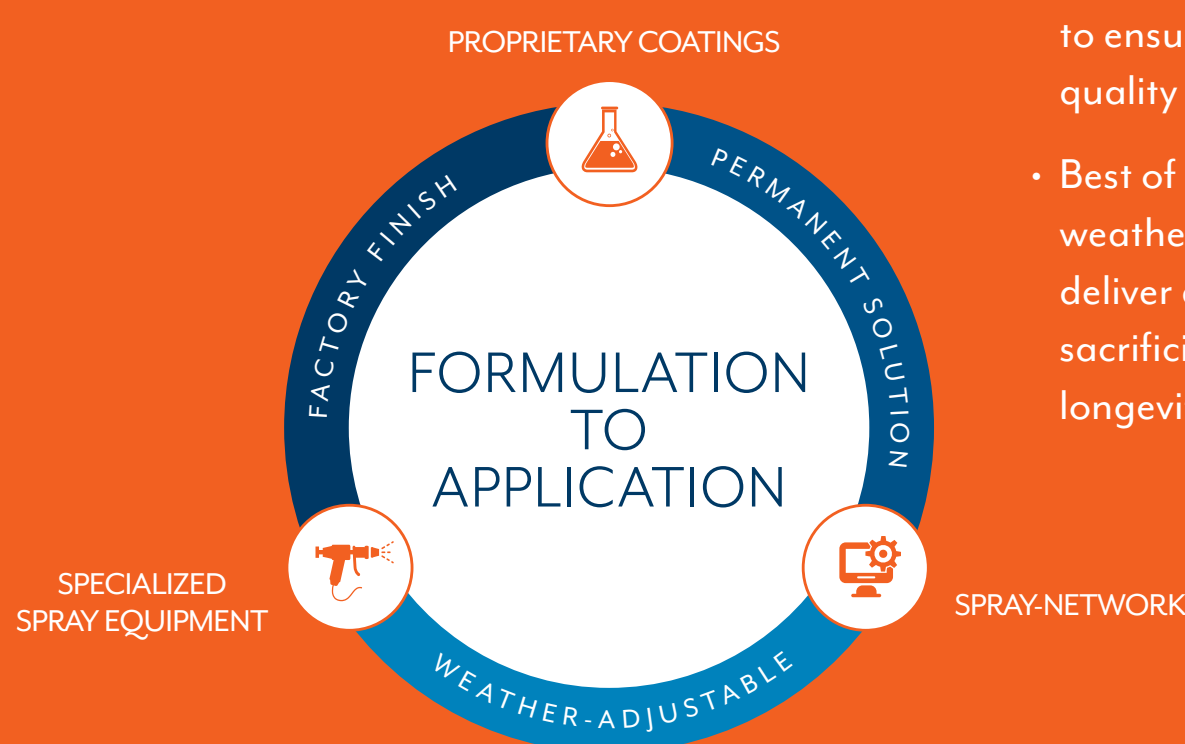

Custom-Blended for Every Job

- Other painting companies rely on "off the shelf" paint that could be purchased in any hardware store
- We offer a completely customized paint job to suit individual surfaces, colors, textures, and weather conditions Spray-Net blends a unique, one-of-a-kind paint for each of our customers. We take a wide range of factors into account and implement our patented processes to ensure that they achieve the color, durability, and factory finish they're looking for at a fraction of the cost of replacement.
- The science behind our patented processes are advanced: Our Vinyl Shield™ allows us to fortify vinyl enough to paint it in darker colors and virtually eliminate the risk of warping. This is one of our patents!
- It's easy for our franchisees to order custom blends for their clients using The Spray-Network, an online interface that allows them to manage their workflow

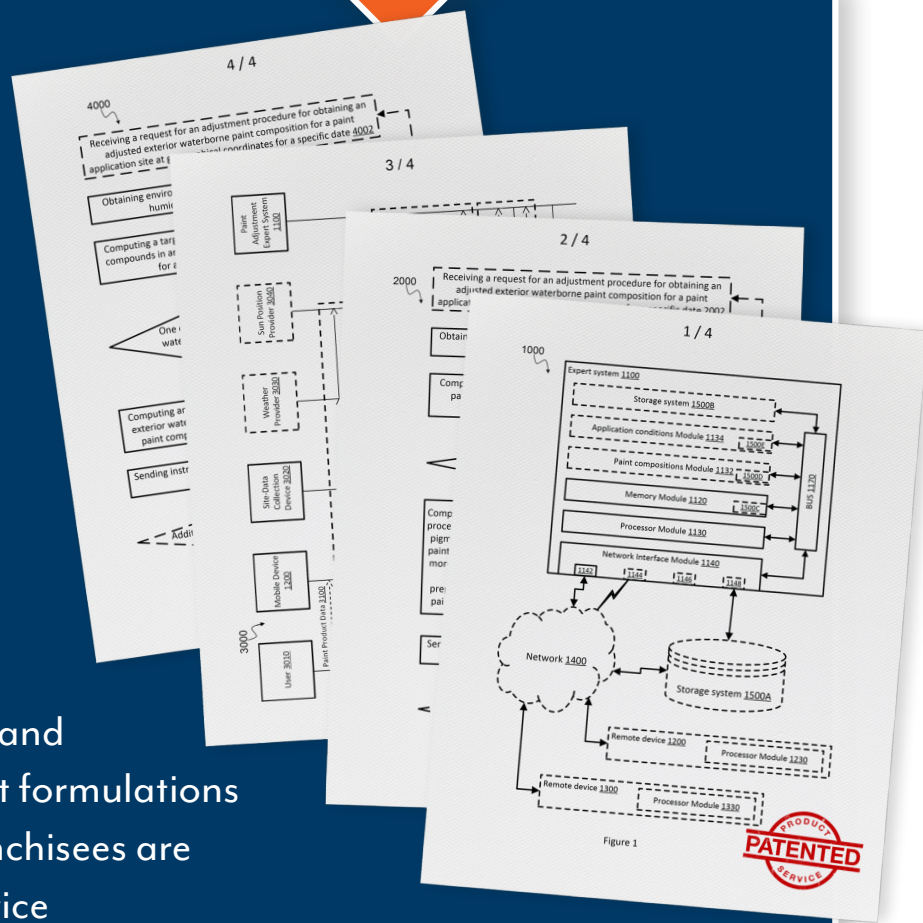

Unique Patented Weather Adjustments

- Spray-Net has developed a number of additives that influence factors like dry time and viscosity to help our application process go smoothly in a range of weather conditions, outside of the controlled environment of a factory
- Other brands risk peeling and chipping if they're applied in the wrong weather. Spray-Net's paint can be adjusted to the unique weather conditions in the area on the day of the transformation to ensure a great finish and high-quality every time
- Best of all, these cost-effective weather additives allow us to deliver a great paint job without sacrificing convenience and longevity

Easy to Maintain

- Our cross-linking technology and formulas free of fillers make for surfaces that are smooth to the touch, that withstand the test of time, and don't require extra maintenance Spray-Net's patented processes and our surface-tailored proprietary formulations of gloss, resin, pigment, and additives allow us to provide a paint job that's easy to maintain without sacrificing color or longevity!
- We own the rights to these patented processes and are the only ones who can weather-adjust paint formulations on-site based on weather parameters. Our franchisees are able to offer a truly unique and in-demand service
- A Spray-Net paint job is permanent, meaning our customers never need to worry about repainting once they've invested in our services

Spray-Net's products and processes can't be found anywhere else, giving our franchisees a huge advantage in their territories. **Visit our website** to learn more about becoming a Spray-Net franchisee!
